PROFESSIONAL SUMMARY

Junior Full Stack Engineer (MERN + Python) with end-to-end ownership of production modules — from responsive UI through backend architecture, scalable REST APIs, and cloud deployment. Cut core API response times by 90% (500ms → 50ms) while building microservices, real-time collaborative editing, and an AI-powered RAG retrieval system for a fintech platform. Strong foundation in JavaScript, React, Node/Express microservices, relational databases, and AWS, with a habit of using AI-assisted development tools to ship reliable, well-tested software in fast-paced Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6/ES7), Python, C#, SQL

Frontend: React.js, Redux, Next.js, HTML5/XHTML, CSS3, DOM Manipulation, JSON, Tailwind CSS, GSAP

Backend & Data: Node.js, Express.js, REST APIs, Microservices, MongoDB, MySQL, SQL Server (relational DB design), Qdrant, Yjs / Hocuspocus

Cloud & DevOps: AWS, Amazon EKS, Terraform, VPC Architecture, Git, CI/CD

Testing & Practices: Vitest (Jest-compatible API), Unit / Integration / Functional Testing, Performance Profiling, Code Reviews, Technical Documentation, Agile / Scrum / Kanban (user story-driven delivery)

AI: RAG, Vector Search, AI-Assisted Development Tools

WORK EXPERIENCE

Junior Full Stack Engineer (MERN + Python) — TurboStart

Jan 2026 – Present

- Own end-to-end delivery of 5 core modules for a fintech platform, spanning responsive UI/UX, system architecture, backend development, and cloud deployment.
- Architected the backend for Auditee AI from the ground up — authentication, file processing, and data pipelines — powering a dashboard that surfaces auditing results to 20 users.
- Reduced core REST API latency by 90% (500ms → 50ms) through query optimization and caching, validated with performance profiling under load.
- Authored unit and integration tests with Vitest (Jest-compatible API) across frontend and backend, cutting production defects by ~40%.
- Participated in code reviews and maintained technical documentation for shared modules, incorporating peer feedback to raise code quality across a cross-functional Agile team.
- Built a RAG-based semantic search over 1,000+ documents using vector similarity (Qdrant), returning ranked matches to improve candidate-matching relevance.
- Implemented a real-time, multi-user collaborative editor (Yjs, Hocuspocus) ensuring conflict-free sync across concurrent sessions.
- Deployed distributed, multi-tier services to Amazon EKS behind a segmented VPC and provisioned infrastructure with Terraform, cutting manual configuration by 60%; monitored and supported services across dev, test, and production.

UI/UX Developer — TurboStart

Jul 2025 – Dec 2025

- Designed and developed animation-intensive, production-grade web interfaces using Next.js, Framer, and GSAP, delivering polished, high-performance user experiences.
- Built adaptive, responsive UI components consuming JSON APIs with efficient DOM updates, reducing page load time by 30% through animation and caching optimizations across devices.
- Integrated internal and third-party APIs into production applications and collaborated with product/design teams in an Agile environment to deliver pixel-perfect interfaces.

UI/UX Developer Intern — TurboStart

May 2025 – Jul 2025

- Designed responsive web interfaces and landing pages using modern JavaScript and CSS frameworks, ensuring cross-device compatibility.
- Assisted in implementing interactive animations and reusable UI components within an Agile/Scrum workflow, delivering production-ready features on schedule.

EDUCATION

B.Tech in Information Technology, SNS College of Engineering, Coimbatore

GPA: 8.7/10 | 2021 – 2025

CERTIFICATIONS & ADDITIONAL

- Completed web-development certifications through NPTEL, Coursera, and Udemy.
- Solved 100+ problems on LeetCode, strengthening data structures and algorithms proficiency.
